

Your Health, Our Shared Priority

A Personal Message from Dr. Ida Lapino, Medical Director

At General Health Care of Massachusetts, we view every member as a partner in their wellness journey. Your health outcomes matter to us deeply, and we're committed to making quality care accessible and affordable for all our members. Together, we can navigate healthcare decisions with confidence and clarity.

Maximizing Value in Your Prescription Plan

Starting **March 1, 2026**, Lipitor® will move to Tier 3 of your prescription coverage. This adjustment helps us maintain stable premiums while continuing to deliver exceptional care.

Why We Make Changes

To keep monthly premiums stable and predictable for all 140,000 members in our plan

The Power of Generics

75% of all prescriptions in the United States are now filled with generic medications

Clinical Fact

FDA-approved generics provide identical medical outcomes and therapeutic benefits as brand names

Your Choices & Savings

Understanding your prescription tiers helps you make informed decisions about your cholesterol management. Here's how the tiers compare:

Tier Level	Cost	Examples
Tier 1	Lowest Copay	Simvastatin, Pravastatin, Lovastatin
Tier 2	Mid-Range	Crestor®, Zetia®
Tier 3	Highest Cost	Lipitor®

Significant Savings Opportunity

Switching to a Tier 1 generic can save you **up to 100%** on monthly out-of-pocket costs while providing the same proven heart protection and cholesterol management.

Protecting What Matters Most

Your Health Comes First

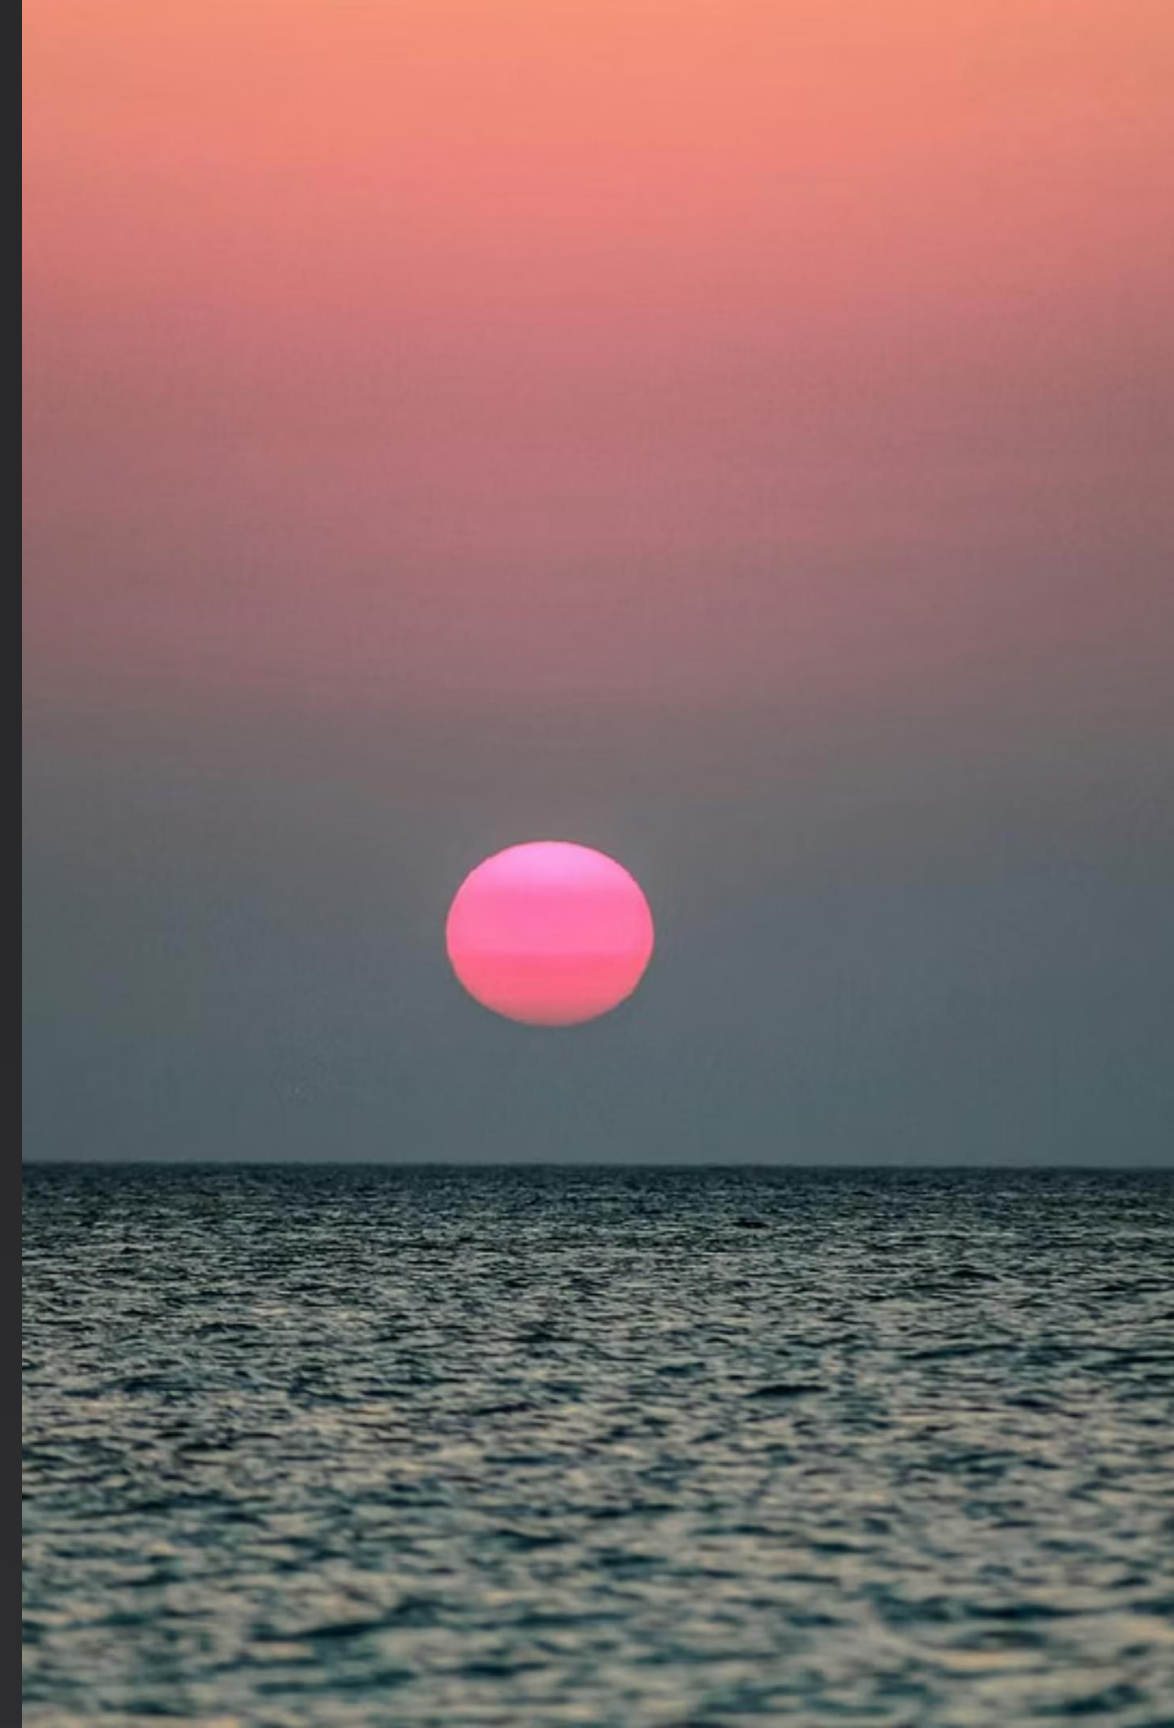

You shouldn't have to choose between your health and your budget. Quality care should never come with impossible trade-offs.

The Same Quality, Different Name

The name on the bottle may change, but the quality of your care remains world-class. Generic statins are rigorously tested and clinically equivalent.

Peace of Mind

We're here to support you every step of the way, ensuring you have the resources and information to make confident healthcare decisions.

Moving Forward Together

These simple steps will help you navigate your prescription coverage and maximize your benefits:

01

Talk to Your Doctor

Discuss Tier 1 generic options with your physician. They can help determine if a switch makes sense for your specific health needs.

02

Use your coupon

Visit www.gen-hcmass.com to use the personalized \$25 coupon.

03

Connect with Support

Call Member Services at 1-800-XXX-XXXX for personalized assistance with your prescription questions and coverage concerns.
